DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 57-61,65,68,69 and 72 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4922633 (Sartor).

Sartor teaches a ski boot (see the embodiments shown in figures 1-10 and 11-19) substantially as claimed including a flexible highback portion (rear quarter), medial and lateral side cables members (cables 15,52,61) wherein the forward ends of the cable are located on the medial side of the boot (the cables extend on both sides of the boot and therefore would include the medial side of the boot), and a tension adjustment member comprising an engaging arm (lever) including plural engaging members (best shown in figure 2). With regard to the cable being a continuous cable, the embodiment shown in figures 7 and 10 has a continuous cable.

Response to Arguments

- 3. Applicant's arguments with respect to claims 57-61,65,68,69,72 have been considered but are most in view of the new ground(s) of rejection.
- 4. Applicant's arguments filed 2-6-02 with regard to the withdrawn claims have been fully considered but they are not persuasive.

Art Unit: 3728

Applicant argue that the "elected species of the invention shown in FIGURES 13-16 also comprises a highback and inner shell. However, by the nature of figure 16, only some aspects of the inner shell and highback are shown (some in phantom).

In response; no where in the specification does it indicated that the embodiment shown in figures 13-16 have the aspects of the highback and the inner shell as shown in the other non-elected species. Applicant has presented any evidence to the contrary.

Applicant argues "With regard to claims 66 and 67, cable members are shown looping around the pulley (in phantom) in figure 16".

In response, the cable member is shown but not with regard to the locations that are within 1 to 2 inches of each other. This is shown in figure 36, see pg. 16, lines 3-5.

Regarding claims 74 and 75, the elected embodiment doesn't include an ankle strap secured to said shell ember and further comprising a lace.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3728

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111. Moreover, "The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06" MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.

6. Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08. The Group clerical receptionist number is (703) 308-1148.

In order to avoid potential delays, Technology Center 3700 is encouraging FAXing of responses to Office Actions directly into the Center at (703) 872-9302 and After Finals to (703) 872-9303 (FORMAL FAXES ONLY). If the previous Fax numbers are not working use any of the following numbers (703) 305-3579 or (703) 305-3580 or (703) 305-3590.
